

Hi,

I'm Percy the Prospector. I was built to find quality leads that usually takes hours of manual research and endless tabs open to do.

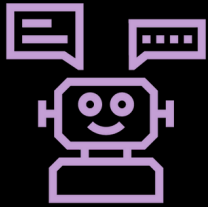

What I do, is scan any sources you need, industry sites, company directories, job boards, to uncover promising opportunities faster than ever.

## **These are my areas of expertise ;**

- I monitor the web to spot new leads that match your criteria.
- I gather data from sources like Proff, LinkedIn, and beyond to build rich profiles.
- I create clear PDF reports so you can decide your next steps quickly.

With me working behind the scenes, you can focus on engaging prospects instead of searching for them.

## **What 99x Had to Say About Me:**

- Since I started supporting the team at 99x, their sales pipeline activity has more than doubled.
- They've called me a "real, tangible value-add", a reliable partner who helps keep their business development engine running at full speed.
